

All In One Trading App

TABLE OF CONTENTS

About the Project

Trading for Cryptocurrency , Stocks
and Bonds require different
platforms.

01

Major Requirements

Integrating and Conversion

02

Project Goals

Making an all encompassing
platform for trading everything with
main focus on Stocks and
Cryptocurrencies

03

TEAM MEMBERS

Avinesh Pratap singh (20je0219@cse.iitism.ac.in)

Aviral Kumar Singh (20je0220@cse.iitism.ac.in)

Soutrik Das (20je0971@cse.iitism.ac.in)

Sundram Anand (20je0987@cse.iitism.ac.in)

Rashi Kumari (20je0771@cse.iitism.ac.in)

WHAT WE ARE WORKING ON

CRYPTOCURRENCY

There is a pressing need for a web-based investment platform that provides a one-stop-shop for investors to manage their portfolios across a range of asset classes.

STOCKS

By offering real-time market data and investment recommendations, this platform can help investors make informed decisions and maximize their returns

BONDS

This platform can revolutionize the investment industry by creating a digital currency that incorporates all of these different assets

ABOUT THE PROJECT

Our Initial plan was to make an All in One Trading App ie we wanted to bring the trading and evaluation of stocks and cryptocurrency and bonds to the same platform.

The background is a dark navy blue. It features several decorative elements: a large, light blue gear outline in the bottom left corner; a smaller, solid light blue gear with a circular outline above it in the top center; a solid light blue gear with a circular outline in the bottom right corner; and various horizontal and vertical lines in white and light blue scattered across the top and right sides.

“The stock market is a device for
transferring money from the
impatient to the patient.”

—Warren Buffett

NOW

Separate Portfolios

No Integrations

No conversion algorithm

FUTURE

Payment Processing

Integration

Conversion

MAJOR REQUIREMENTS

Cryptocurrencies

There is a pressing need for a web-based investment platform that provides a one-stop-shop for investors to manage their portfolios across a range of asset classes.

Stocks

By offering real-time market data and investment recommendations, this platform can help investors make informed decisions and maximize their returns

Bonds

This platform can revolutionize the investment industry by creating a digital currency that incorporates all of these different assets

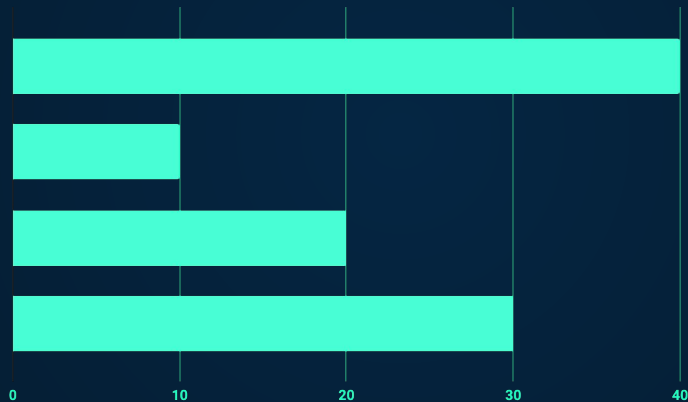

BUDGET

20%

THINKING

20%

API

30%

PROGRAMMING

30%

WEB DESIGN

OUR GOALS

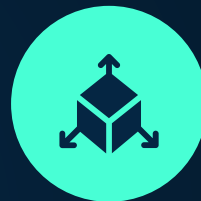

USABILITY

User can See all assets
relative prices and
manage their portfolio
at single platform

POSITIONING

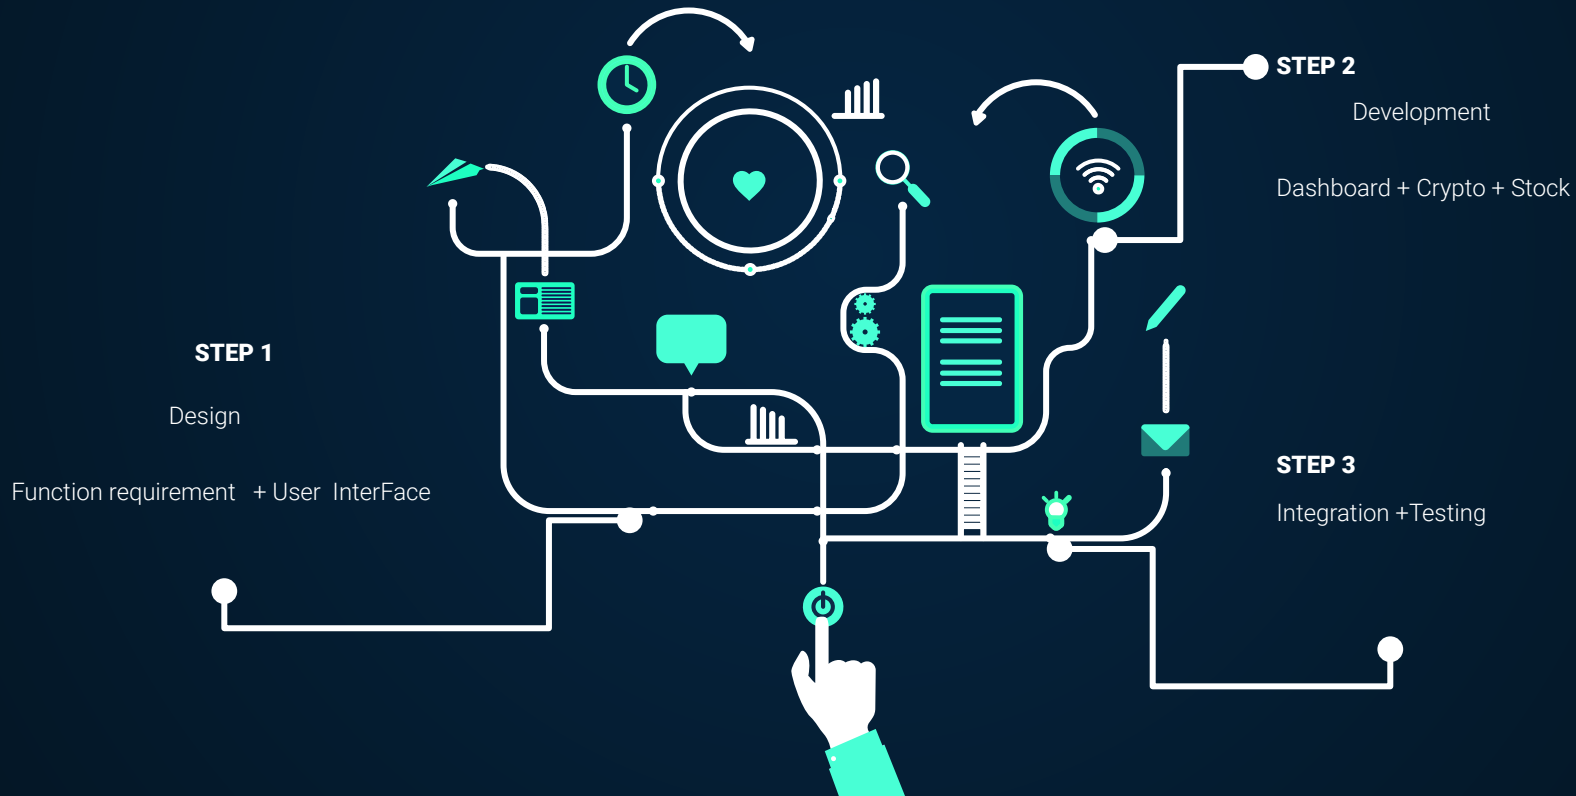

Universal Platform
for all kind of assets

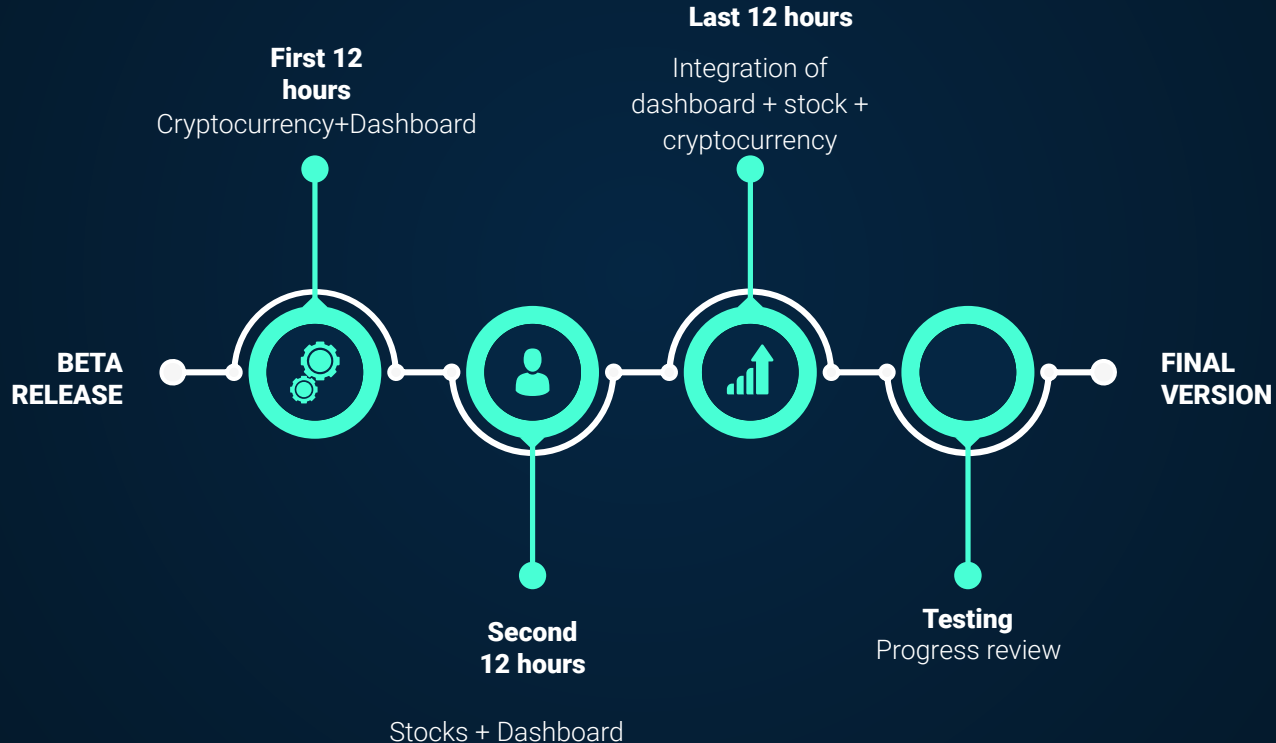

EXPANSION

we can also integrate
new assets

PROJECT STAGES

OUR TIMELINE

CREDITS

- Requirement +Design -> Avinesh , Sundaram , Soutrik, Aviral , Rashi
- Dashboard -> Avinesh , Rashi
- Cryptocurrency-> Sundaram , Aviral , Avinesh
- Stock -> Avinesh , Soutrik
- Integration + Testing -> Avinesh , Sundaram , Aviral , Soutrik , Rashi
- PPT design and Documentation -> Rashi , Soutrik , Avinesh , Sundaram , Aviral
